

## **DATA ANALYST**

The Data Analyst at JUSPAY is an important position JUSPAY has to offer. You will be responsible for delivering value directly to millions of users per day and leading merchants across industries, banks and other stakeholders in the mobile payments space.

DA at JUSPAY will be excited to look for data to quantify problems and measure solution improvements. Are you one of them?

### **WHAT YOU'LL DO**

As a DA, you'll be responsible for operational excellence and maintaining the quality of JUSPAY products. Continual improvement is the name of the game. You'll be

1. Working on real project and help with reports to enable business critical decisions from the beginning.
2. Crunching numbers day in day out by writing SQL, Python Scripts and using google sheets to understand issues and present them right.
3. Create impactful data visualisations using tools such as Tableau that communicate the story from the data.
4. Constantly looking for ideas to add value to the customers and our business partners

### **WHAT YOU NEED TO KNOW/HAVE:**

- Data-driven decision mentality and strong analytical thinking.
- Design sense and deep empathy towards the users to improve user experience.
- Good communication skills and ability to persuade the stakeholders with logical reasoning and data visualisations.
- An attitude to not stop until you get things done. Get your hands dirty and gain depth.
- A penchant for new learning and experiences. Open to candid feedback, learning and change.
- A fierce commitment to excel and invest in getting better at everything you do.

### **WHAT YOU GET**

- An unique opportunity to make a difference to millions of people from the insights you share.
- Opportunity to think fundamentals and work in best-in-class framework solutions.
- Sharp, motivated co-workers in a fun office environment.

Interns, on good performance will be given a full time offer.
